

Ideation Phase

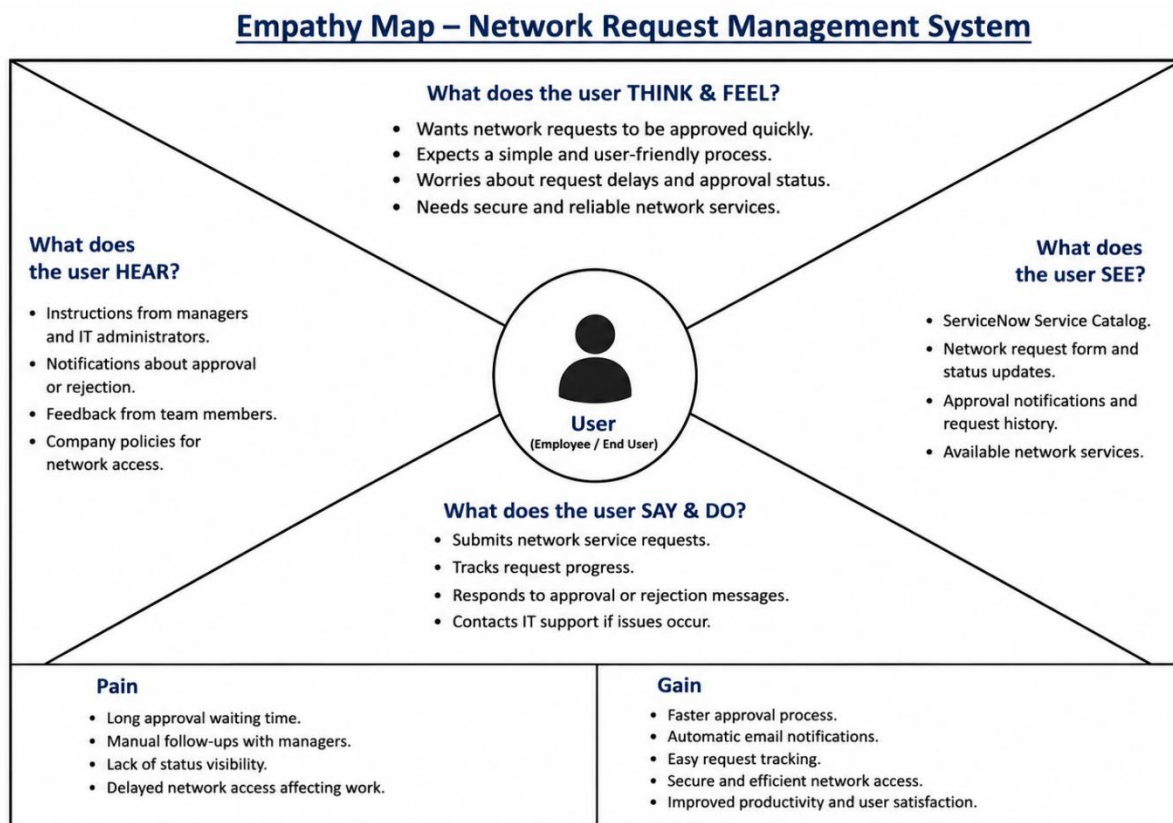

Empathize & Discover

Date	29 June 2026
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple visual tool used to understand the needs, thoughts, feelings, and behaviors of users requesting network services through the ServiceNow portal. It helps identify user challenges, such as delays in approvals and lack of request tracking, enabling the development of an automated approval workflow that provides faster processing, real-time status updates, and an improved user experience.
